

If you're experiencing pain or health challenges, you've come to the right place. We act as your partner to develop a personalized plan to accelerate the healing of your pain. Using our comprehensive approach, and the latest most effective technology, our goal is to ensure that you enjoy a life without limits.

We developed a unique step-by-step process called The Accelerated Healing Program™ to help you achieve your health goals as quickly as possible. We take the time to fully investigate the source of your pain, and appreciate how it has affected the quality of your life. We care enough to prescribe a customized solution that accounts for your lifestyle, health goals, and availability for treatment.

The Accelerated Healing Program™

Helps you develop a personalized plan to accelerate the healing of your joint and muscle pain. Created by Canadian Laser & Pain Therapy, The Accelerated Healing Model™ will help you save time and money, eliminate pain quickly and without drugs, and enjoy a better quality of life.

"Most people suffering from muscular-skeletal pain have been living with the pain for a long time, but they may be unaware of their options to accelerate healing," says Dr. Paul Ziemer. "Many take drugs daily to manage the pain and inflammation, but their problem may continue to get worse. They may have poor health habits and their body structures may be declining. They may avoid activities for both work and fun, and have a poor quality of life. It may be difficult to get a good night's sleep. As a result, they may feel discouraged and frustrated.

"They may also not know whom to trust because they have wasted a lot of time and money on pain remedies that didn't work for them. That's why we created The Accelerated Healing Program™: to help you accelerate the healing of your joint and muscle pain and take the limits off your life."

The Accelerated Healing Program™ is a step-by-step program divided into distinct phases. In phase one, you participate in a one-on-one Quick Start Session to assess your current pain and how it is affecting your lifestyle. When you've completed the session, you'll be ready to join The Accelerated Healing Program™, which helps you develop a detailed plan individualized for your situation. You then take advantage of The Accelerated Healing Toolbox, our team of health care professionals and leading-edge healing modalities.

Some of the benefits you may expect from The Accelerated Healing Program™ include:

- You are pain free and drug free.
- Your health habits are improved and good body structure is regained.
- You have no limits to your activities for both work and fun.
- You sleep better.
- Your relationships and social life are improved.
- You are more productive.
- You feel more youthful and enjoy the best possible quality of life.

“As well, you have greater knowledge about your health. You are proactive in maintaining your health and function with guidance. You take action to avoid the recurrence of pain. You are more engaged in life and feel content and excited about the future. . And, most importantly, you save time and money, eliminate pain quickly and without drugs, and enjoy a better quality of life.”

TESTIMONIALS

After diving for a line drive I fell awkwardly on my shoulder and slightly tore my rotator cuff. After my Laser sessions, not only was I playing again, but I was totally 100% pain-free, and was able to go on a golf vacation for a week. Many of my friends have now gone for treatments after seeing how well it worked for me. Avoiding a painful surgery and rehab was another benefit of Laser Therapy.

Anthony G

I was told I had arthritis in my back and knees. After laser therapy my low back pain was gone and my mobility in my knees has never been better.

Carla A

After putting up with the pain of carpal tunnel syndrome, I looked at Laser therapy as my last, non surgical opportunity to get better. After a series of sessions not only did the pain subside but my range of use for my hand was greatly increased and the sense of relief was huge. I'd recommend Laser Therapy.

Helen S.

Corporate Health Presentations

The success of any company depends heavily on the productivity and performance of its human resources. The ability to function and perform consistently at a high level is greatly enhanced by Employee Health & Wellness Programs. According to research, Employee Health & Wellness programs lead to a more productive work environment.

These programs focus on the physical well being of employees, look after medical requirements and ensure personal health is a priority. Programs offer weight loss regimes, smoking cessation solutions, stress management and exercise, diet and wellness advice.

We can help provide choices for your employees that can ultimately lead to happier and healthier lives. Contact us for a free 30-minute lunch and learn presentation. One of our clinicians will come to your office and discuss health concerns with your employees and answer questions. Your employees will also be given our educational package called The Top 10 Wellness Techniques. This package explains ten things they can do right away to dramatically improve their health.

Top 5 reasons your company needs an Employee Health & Wellness Program

- #1 Reduced Absenteeism
- #2 Work Place Morale
- #3 Increased Responsibility
- #4 Increased Productivity
- #5 Reduced Overall Costs
